

Equipment & Manufacturing Capabilities

3 Moulders:

Our moulders are capable of moulding wood up to 4" high and 9" wide.

Capabilities: Beaded Ceiling, Log Cabin Siding, Ship lap, Carsiding, Tongue & Groove Patterns, Round Poles, Handrail, Window Extension Jambs, Base & Casing Patterns, CMEV1S Decking, Custom Patterns

2 CNC Routers:

Capabilities: Deck Post Caps, Particle Board Cores, MDF Flanges, Drawer Slides, Cabinet Door Templates, Military Shell Packaging.

Gang Rip Saw:

Rip various widths. Maximum width of 23 ¾" Minimum width ¼"

Capable of ripping up to 2 5/8" thickness. Capable of ripping wood and tempered hardboard.

Rip 4 x 8 sheets of material down to various items. Ex: Plywood Strips, Building Shims

Pistorious:

Ability to cut 2 – 45° angles at the same time.

2 Casseses:

The Cassese is used to assembly deck post trim or picture frames.

Industrial Chop Saw:

Capable of chopping up to 1 ½" thick wood and up to 9" wide.

Used to chop wood to various lengths. Capable of chopping of wood and tempered hardboard.

Ex: Dock Material, Building Shims, Extension Jambs,

Sliding Compound Mitre Saw:

Used to cut various lengths and angles on wood. Ex: Dog Eared Fencing

Band Saw:

Used to cut wood wedges and various other things.

52" Sander:

Capable of sanding material up to 52" wide

Typically sand 4 x 8 sheets of plywood.
